# LIVIND CREATIVE AND LIVING CULTURAL HERITAGE

The LIVIND project brings together partners from nine North European countries to focus on connections between living heritage and sustainable development!

In this project we map and test, study and share good practices that support safeguarding living heritage in more sustainable ways and learn about how living heritage can contribute to achieving Sustainable Development Goals (SDGs) of the UN Agenda 2030.

First of its kind and scale in Northern Europe, the project strengthens networking across the wide distances and collects and distributes new ideas for living heritage actors all over the world!
